

# Tanseki Mauritius

October 2021

Mauritius covers an area of 1,865 km<sup>2</sup>.

It measures in its largest dimensions 65 km in length and 45 km in width.

The highest point is the « Piton de la Petite Rivière Noire » which rises to 828 meters.

Its coastal plains and a central plateau have long allowed the extensive cultivation of sugar cane and tea.

**1** - « Trou-aux-Biches » is a town on the north coast of Mauritius located in the district of Pamplemousses. Trou-aux-Biches means hind hole. Our accommodation is located in this city

Adam hunted that coral, he said it looked like a mountain with a pool

We spent very short time collecting stones, under an hour total. But the quality of the stones is truly extraordinary. the stones are deep black and they are very hard.

Unfortunately I could not leave with a lot of stones because I have limited luggage. I will select the most beautiful and the least heavy.

**2** - "Grand Baie" is a fishing village in the north of Mauritius.

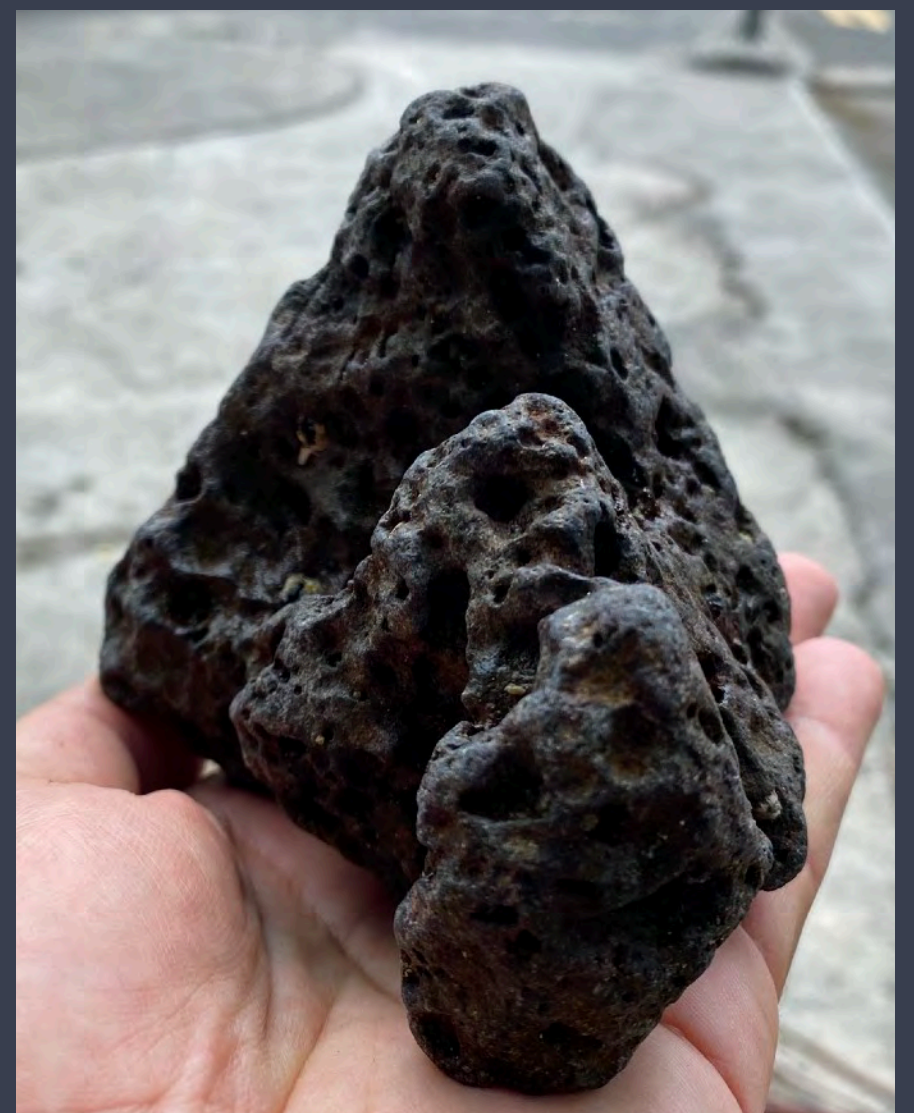

It is one of the most beautiful stones I have found here.

I made a virtual daiza to see what it can be look

This is a virtual daiza

**3** - Black River Gorges National Park, it is located in the southwest of Mauritius.

We couldn't explore the river. The hike was difficult

I hope next time.
